Q-Apps®

- Centralized workflows and data comparisons
- Robust analytics to drive improvements
- Regular updates ensure accuracy, compliance, and ease of use
- SOC2 + HITRUST compliant security

Exploring Q-Apps

Clinical expertise

1,300+ clinical data experts

170 million+ questions answered

85%+ have a clinical nursing background

13 million+ total cases abstracted

120k+ hours/year on quality assurance

The role of Artificial Intelligence in clinical data management

- Assist clinical data experts in identifying recurring themes and trends through topic modeling and natural language processing
- Allows experts to work through data using their expertise as an auditor vs. an abstractor
- AI-enabled automation scales the capabilities of experts, improving efficiency, reach, and data integrity

Q & A

**With Sarah, Jen, and
Jennifer**

Thanks for joining!

**Please complete our quick survey tell us what you liked
and would like to see in our next webinar. You will see a pop-up
after the webinar!**
